

HP recommends Windows® 7 Professional.

Reliably
consistent
for your business needs

Take over your computing capabilities

Everybody On 

THE SMART BUSINESS SOLUTION

The HP Pro 3330, Pro 3335 and Pro 3340 Business Desktops are suitable for use in any industry, for small to medium-sized businesses (SMB), or to those in public sectors. This series is ideal if you might prefer commercial purchasing to retail, and value reliability, quality and price over security, management and performance.

Also, these business desktops will undoubtedly cut down on your IT workload because of its reliability and easy out-of-the-box setup and maintenance.

If you have existing hardware, the excellent connectivity will also keep your legacy hardware in use, saving you from extra costs.

Whether you are a business owner, or an office manager, you will find that within the HP Pro 3330, Pro 3335 and Pro 3340 Business Desktops, there will definitely be one to suit your every need.

ADVANTAGES FOR YOUR BUSINESS

An economy ticket that lets you fly business class is every traveller's dream. Translate that dream into a computing reality by investing in the HP Pro 3330, Pro 3335 and Pro 3340 Business Desktops.

The series offers the best computing value in business class computers, built upon HP's four pillars of value. This promises commitment, connectivity, consistency, as well as control. With this solid infrastructure, you can be assured of an affordable option for the office.

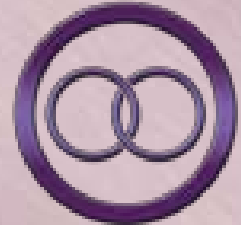

Commitment

With BVR/PVC-free materials used, HP is committed to make its products environmentally friendly. Besides building the environmentally responsible HP Pro 3300 series, HP has also developed software in the form of HP Power Assistant, which allows you to monitor and control your workstation for optimal power efficiency.

Connect

Equipped with the HP Virtual Room, the HP Pro 3300 series allows you to interact in real-time with your peers, even with huge computer-aided design (CAD) files and high-definition (HD) videos. The seamless connectivity ensures you never get cut off from your work, colleagues, or clients even if you are in a different part of the world.

Consistency

At HP, our Annual Service Event Rate has steadily decreased by 39% from 2004 through 2009, proving that our products have become more reliable with time. From our extensive testing all the way to getting in-depth customer feedback, we strive to provide you with the most consistent and reliable products.

Control

With our specially formulated in-house HP ProtectTools suite, we give you near limitless control over the HP Pro 3300 series of business Desktops. Synchronise profiles and tasks across devices, or enhance security by adding cutting edge face recognition technology.

- 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information. Multi Core is designed to improve performance of certain software products. Not all customers will necessarily benefit from the use of this technology. Intel's numbering is not a measurement of higher performance.
- This system requires a separately purchased 64-bit operating system and 64-bit software products to take advantage of the 64-bit processing capabilities of the AMD 64 processor. Given the wide range of software applications available, performance of a system including a 64-bit operating system will vary. Dual/Quad/Triple Core is designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefit. Not all customers or software applications will necessarily benefit from use of this technology. This PC does not support the AMD over-clocking feature. AMD's numbering is not a measurement of clock speed.
- Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.
- For hard drives, GB = 1 billion bytes; TB = 1 trillion bytes. Actual formatted capacity is less. Up to 15GB of system disk is reserved for system recovery software.

TECHNOLOGY AND DESIGN

The HP Pro 3330, Pro 3335 and Pro 3340 Business Desktops offer you a host of capabilities, from being compatible with legacy components to reducing IT management with its enterprise-class reliability.

Also, you can customise the PC to suit your computing needs, ranging from RAM options to processors and graphics.

- Choice of multiple Intel® Core™ and AMD processors
- Expandable memory up to 16GB on select models
- SATA hard drives up to 1 TB
- Legacy hardware support
- Integrated Intel® HD Graphics and ATI Radeon 4200 Graphics are standard and upgradable

The HP Pro 3300 series is engineered with three priorities in mind - energy efficiency, material innovation and recyclability. The smart design is space-efficient, giving you the much needed extra office space, while not compromising on the connectivity, expandability as well as configuration options. The standard tower version is suitable for any office space and will blend in perfectly with the sleek, black casing. The slim counterpart of the tower design is catered to the minimalists and style conscious users, who require a slim, beautifully crafted case to enhance that professional look.

MANAGEABILITY AND SECURITY

The HP Pro 3300 series comes equipped with a full suite of security measures and software enhancements, aimed at providing you with ease of management and peace of mind.

HP Client Automation

Streamline and simplify PC management across your business and throughout the PC lifecycle, that boosts productivity while driving down IT costs. Benefits include:

- Simplicity
- Scalability
- Improved patch compliance and security

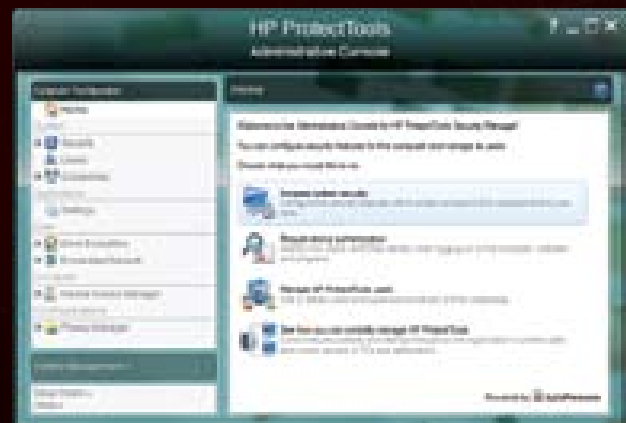

HP Virtual Room

- Conduct meetings, classes and presentation in real-time, in any place with Internet access
- Video, audio, whiteboard and editing tools offer a hands on approach
- Schedule integration with Microsoft Outlook means you will never miss a Virtual Room appointment

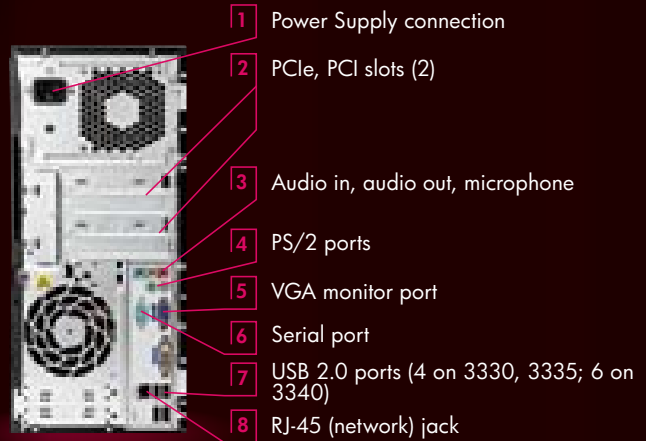

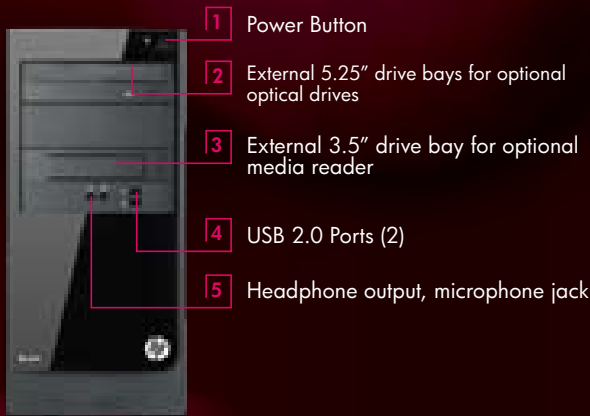

HP ProtectTools

- **Drive Encryption** – Prevents access by unauthorised persons
- **Device Access Manager** – Prevent unauthorised copying
- **HP DigitalPass** – One-time password to protect
- **Credential Manager** – Stores access information and automatically signs into protected websites

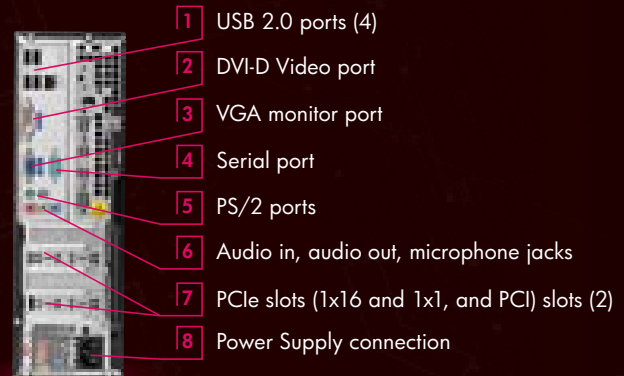

FEATURES OVERVIEW

HP PRO 3330, 3335 & 3340 Microtower

HP PRO 3330 Small Form Factor

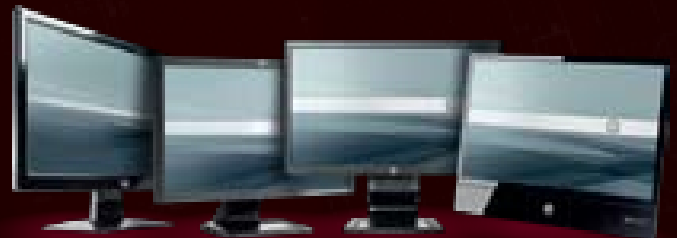

COMPLEMENT YOUR DESKTOP

Enhance your business desktop with our wide range of computing accessories and enjoy enhanced productivity and functionality today.

Business Monitors

Packed with cutting-edge display technologies, enhanced ergonomics, and advanced energy saving features, HP Business Monitors are the perfect companions to the HP Pro 3300 series.

Accessories

Integrated Work Center

HP has the Integrated Work Center as a solution for your clutter and office space constraints. Additionally, the HP Quick Release mechanism allows for easy installation and removal of monitors.

Monitor Arm

The space-saving solution allows you to rotate, tilt and lift to your preference, giving you maximum viewing comfort.
